SPRING 1962 FALL

GERALD D. WALTZ

Grower of Choice Daffodils

P.O. Box 977, Salem, Virginia

TO MY DAFFODILS

I love you, cheerful Daffodil,
In garden or on window-sill.
You are a gay and gorgeous thing,
That shouts to the world - 'It's Spring'.

In colors both soft and gay -
In sunset light or break of day -
I watch you suddenly unfold -
You are a joy just to behold !

Your span of life is much too short
For something with such beauty fraught,
Your passing is so hard to bear,
For your return I wait a year.

Mabel Derrick

February, 1962

To my Customers and Friends, present and prospective -

Offered herein you will find a very comprehensive selection of outstanding Daffodils, many of the finest recent introductions, as well as the best of the older varieties. A large number of Mess'rs. Dunlop, Richardson, and Wilson's varieties are here; orders for many of these, especially the newer higher priced ones, will be filled with bulbs grown by these growers. Most other varieties of theirs, which I have not listed, can also be supplied (with Ireland, or England grown bulbs), at their retail prices, - with no discount, - if your order is sent in early. (See note at bottom of page 7.) You will also find many varieties of recent Dutch origin, which are splendid for landscape use, especially. Many others not listed can also be furnished; please ask for quotations, if interested in some of these.

Then I would call your attention to the select list of other Spring-flowering bulbs, - especially the Tulips, including many outstanding varieties recommended in various garden magazine articles. Especially noteworthy are the new Fosterianas, - similar in form and size to 'Red Emperor', but in varying colors, - and the superb Hybrid Darwins, including several YELLOW varieties. These new yellow varieties, and some of the Fosterianas, are too high priced for general use, but if you want something really 'out of this world' in Tulips, they are 'it'.

Many other varieties of Tulips, much more reasonably priced, are almost as attractive, and by making liberal use of them, in beds and borders, you will have their gorgeous colors (any, or all colors of the rainbow) to cheer you when you are lamenting the passing of the last of the Daffodils, - which, even in good seasons, as was 1961, comes all too soon. By selecting different types, - the Breeders, Darwins (except the Hybrids), May-flowering, and Parrot Tulips all come after the Daffodils; - and by also including Crocus, Hyacinths, Scillas, Dutch Iris, etc., some of which come before the Daffodils, and others at the same time (the Dutch Iris come after the Tulips, even, one's home grounds can be made a 'Spring Wonderland', to be enjoyed over a long period of time, - close to ten weeks, or even more.

TERMS, CONDITIONS OF SALE, ETC.
(Please read carefully)

EARLY ORDERING : Please, place your order (minimum amount \$3.50, please) this Spring, - by May 15th., if at all possible. Then if I do not have enough bulbs on hand of the desired varieties, I can secure them for you from the other growers whose bulbs I use, and recommend. This May 15th. date also applies to the Tulips and other bulbs, as they are all imported.

A generous discount, in cash or extra bulbs (varieties of your choice) will be allowed on all orders received not later than May 15th. (Please take this discount into consideration when comparing my prices with others). The size of the discount depends on the size of your order; these figures are given on the order-sheet, which is enclosed, - unless you have gotten this List thru a Garden Club which is getting up an order, in which case the discount goes to the Club, for some very worthwhile project.

PRICES : the prices quoted are for the highest quality bulbs, - the Daffodils mostly DN #1, or larger (except for some varieties which do not make large bulbs; also bulbs of many varieties as grown in England or Ireland are small compared to Holland or American grown bulbs, but the flowers pro-

duced are 1st. Class, - which is what counts). The Hyacinths are 1st. size (18/19 cm.), and the Tulips and others top-size. The Daffodils are priced per single bulb, with 12 for the price of 10, and 6 or 3 at the same rate (6 for the price of 5, and 3 for $2\frac{1}{2}$ times the each price.) 100 may be had for 70 times the each price, - or 7 times the dozen price. The Tulips, Hyacinths etc. are priced per dozen (no less than 6 of a variety sold), and likewise, 100 for 7 times this dozen price. As this 100 rate is in itself a 30% discount from the single bulb price, no further discount is allowed where it is used.

PAYMENT : should be made in full with your order (check, or money-order), - excepting Garden Clubs, - if you wish to take advantage of the discount. Otherwise, 25% with the order, and the balance September 1st., - or C.O.D., if you prefer.

Please add a sufficient amount for postage, according to the following table, to the total of your order, - unless you wish it sent by Express. (Post usually costs less, except for shipments of 40-50 lbs. or more, going long distances). If too much is sent, - an appreciable amount, - extra bulbs will be sent for same.

QUANTITY*	ZONES 1 & 2 (to 150 mi.)	ZONES 3 & 4 (to 600 mi.)	ZONES 5 & 6 (to 1400 mi.)
$\frac{1}{2}$ dozen (or less)	.30	.35	.45
each addtl. half-doz.	.08	.12	.20

If beyond the 6th. zone, please inquire at your P.O. as to the correct amount, allowing 3 lb. to the dozen for Daffodils and Hyacinths, 1 lb per dozen for Tulips, and $\frac{1}{2}$ lb. per dozen for the other smaller bulbs.

*(These figures are for Daffodils and Hyacinths; for Tulips and the other smaller bulbs allow one-third what the same number of Daffodils would take, - minimum .35, if order is for these smaller bulbs only.

Most Garden Club orders are sent by Railway Express, or Motor freight, and these charges are paid on receipt of the bulbs.

DELIVERY will be made at planting time, in September or October, with northern orders going first, of course. As noted elsewhere, many bulbs from the Pacific North-west, England, Ireland and Holland, - besides my own, - are used in filling my orders, and those orders for which these bulbs are required cannot be sent out until I receive the bulbs. Sometimes this is not as early as I would like, and I am held up some in getting your orders out, but you will still receive them in good time.

GUARANTEE : I exercise every care and precaution in keeping stocks true to name, and buy bulbs only from other growers who do the same. However, mix-ups can occur, and should this happen, and any variety prove untrue, same will be replaced; (but please remember that in a hot, dry blooming season the coloring, substance, and even the form of many varieties is affected, so that they are hardly recognizable as the variety ordered.) This is especially applicable if the variety is of English or Irish origin, and you are going by the originators description, or if you have seen specimens of these varieties flown in from Ireland, - where the season is usually cool.

Likewise, to the best of my knowledge, only sound healthy bulbs are sent out; my fields and harvested bulbs, and those of the growers from whom I buy are regularly inspected by the proper authorities. Any bulbs failing to come up the first year, or being definitely unhealthy, will be replaced (unless, - and this exception would apply only if a number of varieties were involved, - there should be conclusive evidence that it was not the fault of the bulbs.) No responsibility can be accepted for any failure of any sort after the first season, as that would be the result of circumstances and conditions over which I have no control.

Substitutions are not usually made without permission, except occasionally on orders (for older varieties) received late in the season, when a similar, usually better, and often higher priced variety is used, if the one called for cannot be supplied. If even this is objected to, several alternate choices should be given, if it is impossible to send in your order before mid-July, or later. (Don't forget that a generous discount is allowed on orders received by May 15th.)

* * * * *

AMERICAN DAFFODIL SOCIETY : the 1962 Convention of the ADS is being held in Nashville, Tennessee, April 5th. thru the 7th. There will be an interesting program, featuring visits to a number of outstanding gardens, the Southern Regional Daffodil Show, lectures, discussions, etc. on topics of interest, - and much more. Michael Jefferson-Brown, a prominent English grower, and author of "The Daffodil", will be in attendance, and be the speaker at the annual Banquet.

If you are not a member of the ADS, but would like to be, just send your name and (complete) address to Mrs. Grover F. Roennfeldt, 7426 Lynn Ave., University City, 30, Missouri, - together with \$3.00 for your annual dues.

GARDEN CLUB of VIRGINIA STATE DAFFODIL SHOW : this will be held here in Roanoke, at the National Guard Armory, April 11th. and 12th. This is one of the top Daffodil Shows in the Country.

ROYAL HORTICULTURAL SOCIETY Classified List of Daffodil Names, - latest (1961) edition, - \$1.25, postpaid. A few copies of the '58 List, \$1.00.

C U L T U R A L N O T E S

Daffodils are among the easiest of flowers to grow. Given only a little care, and a few required conditions, they will reward the grower with an ever increasing wealth of beauty, year after year. They prefer a sandy loam, but will do well in any good, WELL DRAINED garden soil. Planting should be done in time for the bulbs to make good root growth before winter, - early September thru October, depending on the Latitude of your garden. We have planted bulbs in mid-December, here in Virginia, and had them do well, but this is not recommended. Large bulbs should be set from 5 to 7 inches deep, - to the base of the bulb, - or even deeper, for naturalized plantings. The distance between the bulbs may be anywhere from 6 inches up.

If the soil is rich, no fertilizer is necessary; if just average, bone-meal and/or pulverized cow manure, compost and the like are good. These should be thoroly mixed thru the soil at, or before planting time. A light top-dressing of these, supplemented by wood ashes, ground rock phosphate, etc., applied during the late Fall, or winter before the 2nd., - and subsequent, - blooming seasons, will be found beneficial. If you wish to use a chemical fertilizer, it should contain little or no nitrogen, but substantial quantities of phosphorus and potash. A mulch of peat-moss, spoiled hay, or other good mulching material, applied during the winter, will be helpful in many ways, not the least of which is preventing heavy rains from splashing, and spoiling the flowers.

Daffodils should not be planted in lawns, or any place where the foliage will be cut off before it ripens, as this foliage is needed to mature the bulbs. One of the nice things about Daffodils is that they need not be dug and replanted every year, - every three or four years is sufficient, or when they have increased to the point that they are too thick to bloom well. Naturalized plantings, if planted deeply so that they increase slowly, may be left undisturbed for 10 to 15 years, or more, producing good crops of flowers each year. On the other hand, if blooms are desired for Exhibition purposes, better flowers will result if the bulbs are dug and replanted every second year.

Digging may be done when the leaves have turned mostly yellow, six weeks or so after the end of the blooming season; it is not necessary to wait until the tops have died down entirely, in fact it is better not to do so, as it is then harder to find the bulbs, - and in a rainy season, some may already have started new root growth for the following season. The bulbs should not be left out in the sun, but placed immediately in a cool airy building, in flat boxes or mesh bags. The tops may be left on to dry up, or broken off, as you prefer. After curing a month or six weeks, the roots and outer skins will be dry enough to be removed; this may be done by hand, or by shaking gently in a mesh or burlap bag. Bulbs which pull apart easily should be separated, - otherwise not. Replanting, as described at the beginning of these notes, should be done in September or October.

CHOICE DAFFODILS

Limited space allows only the briefest of descriptions, which are very inadequate, and which may make many varieties appear to be very similar. However, if you have seen these varieties at Shows, or in your friend's (or other's) gardens, you can see that most are quite distinct, with characteristics of their own. If you have attended some of these Shows, and/or visited gardens where they are featured, you likely have made lists of the varieties which you would like to have in your garden next Spring. If you have not been able to do this, there is still sufficient information given here to enable you to select the proper varieties for your needs.

The number and letter preceding the variety name denotes the Division (or Class) to which that variety belongs, - whether it is a Yellow Trumpet, a Bi-color large-cup, Triandrus, Poeticus, - or what; (see the R.H.S. Classification of Daffodils, on page 23, - inside back cover.)

Varieties marked with an (*) asterisk are especially recommended for landscape use, and cutting. They are strong growing, and free-flowering, and priced so that they may be used in quantity. Varieties with (EX.) before the description (if it can be called that) are Exhibition varieties, those which if well grown, and given a little special care and protection, should win Blue Ribbons for you, at your Daffodil or Spring Flower Shows. (Many other varieties, not so designated, are also often 'winners'.)

The (abbreviated) names in parentheses, following the variety names are those of the originators; the letters following give the relative approximate blooming season : EE - extra early; E - early; EM - early mid-season; M - mid-season; LM - late mid-season; L - late; LL - very late.

9	*ACTAEA (Lubbe)(LM)(EX.)	large outstanding Poeticus	.20
3b	ACCOLADE (Rich.)(LM)(EX.)	pure white and intense solid red	3.50
1c	ADA FINCH (de Graaff)(E)	large early white Trumpet	.25
2a	*ADVENTURE (Chapman)(EM)	all yellow; large crown, long stem	.25
3b	AIRCASTLE (Mitsch)(LM)(EX.)	greenish beige, with apricot lemon crown	6.2

1c	CANTATRICE (G.L.Wil.)(M)(EX.)	purest white; still a "winner"	1.00
2b	CARITA (O.B.F.)(M)(EX.)	white; giant coppery pink bowl-shape. crown	7.25
2a	*CARLTON (P.D.Will.)(E)	all yellow; excellent for borders, etc.	.25
2c	CARNLOUGH (G.L.Wil.)(EM)(EX.)	white; (crown opens with pale pink rim)	.35

* * * * *

DUNLOP, RICHARDSON, WILSON varieties; - some of the higher priced varieties from these growers which were listed last year, have been omitted currently, but they can still be supplied, as well as practically all other varieties of theirs, (bulbs of their own growing), at their retail catalogue prices, - net, with no discount, - if your order is sent in EARLY this Spring. Varieties listed and grown by Michael Jefferson-Brown, - and also by Grant Mitsch, of Canby, Oregon, may likewise be ordered.. Thus, most of your wanted varieties of Daffodils from these growers, as well as from Holland (a large number of these included in my List), together with desired Tulips, Hyacinths etc., can be secured all in one order, likely with less Postage cost, and no Import Permit to bother with.

If you prefer, you may also have varieties from the above named growers which I do list, - at \$1.00 or more, - at their catalogue prices, with NO discount. Varieties so ordered should be listed in a group separate from those on which a discount is to be taken. Also, these optional prices may be used only if your individual order is sent direct to me; if your order is part of a Garden Club order, there is a discount, - received by the Club.

3b	CARNMOON (G.L.Wil.)(L)	white; creamy white, green eyed cup, rim. lemon	2.35
2b	CASTLECOOLE (Dun.)(LM)(EX.)	large white; rim of crown colored	2.65
2c	CASTLE OF MEY (G.L.Wil.)(M)(EX.)	ice-white, with tinge of green	12.25
5a	CATHEDRAL (O.B.F.)(LM)(EX.)	2 - 3 large pure white flowers	3.25
2a	CEYLON (Rich.)(EM)(EX.)	golden yellow and rich orange-red	.75
2b	*CHAMPAGNE (van Leeuw.)(M)	white; large creamy salmon-pink crown	.30
6a	CHARITY MAY (Cole.)(M)(EX.)	charming all yellow Cyclamineus	.50
3b	CHARMANT (de Graaff)(LM)	white and bright scarlet-red	.35
4	*CHEERFULNESS (LL)	3 - 5 creamy white double florets per stem	.22 ¹ / ₂
2a	*CHEERIO (Brodie)(M)	yellow, with frilled orange-red crown	.45
7b	CHERIE (Mitchell)(M)(EX.)	1 - 3 blooms, white with <u>pale</u> pink crowns	.45

1c	GLENBUSH (G.L.Wil.)(M)(EX.)	pure white, of great refinement	2.65

* * * * *

GIFT ORDERS : a nice assortment of Daffodil bulbs makes an ideal gift for a relative or friend, for Christmas (thus obviating the necessity of pre-Christmas rush shopping for the persons so remembered), for Easter (they often bloom right at Easter-time, - except in the more northerly states), for Birthdays and other Anniversaries, and for many other occasions. Not only do they so aptly "fill the bill" for the present occasion, but each Spring, year after year, the recipient will be reminded of your kindness.

As the bulbs can be sent only during September and October, or a little later, a Gift Certificate will be sent on receipt of your order, to the person to be remembered; also, unless you wish to select the varieties yourself, a Price-list will be included, so that he or she may select the varieties desired, - to the amount you wish to spend (minimum \$5.00).

So, if you have had great pleasure from your Daffodils and other bulbs, year after year, why not avail yourself of the opportunity of giving the same pleasure to those whom you cherish.

2c	GLENDALOUGH (Rich.)(M)	white; base of crown tinged green	.40
2b	GLENGORMLEY (Dun.)(M)	white; salmon-orange crown, rimmed lemon	.85

CLUB ORDERS : if you have an attractive planting of Daffodils, Tulips, etc., why not invite your neighbors and friends to come and see them when they are in bloom, and to select the varieties which they would like to have blooming in their gardens next Spring; (please be sure that your variety names are correct). Then by combining their orders with yours, for these, and other varieties from my List, in one Club order, each of you would share the larger discount, - (see order-sheet for details).

If you belong to a Garden Club, and would like to raise funds for a favorite project, may I suggest a special meeting at your home, while these flowers are at their best, so that those who are interested can select the varieties which they would like to order. The discount, - up to 25% cash on a \$300. order (or 40% in Bonus bulbs, varieties of your choice), - would then go to the Club, rather than to those placing the orders. A larger order, and a larger share for the Club, could be gotten by inviting interested non-members, also.

If you do not wish to bother with getting orders such as these together, you will still receive some extra bulbs with your order (varieties of my choice) if orders are received from your friends, and they mention that they saw and admired your flowers, or that you recommended my bulbs. In any case, please be sure that orders are in by May 15th., to be entitled to the discount.

2b	MAGIC PINK (O.B.F.)(IM)(EX.) white, with frilled pink crown	2.15

8	*SCARLET GEM (P.D.Will.)(M)	primrose, with deep orange cups	.25

* * * * *

HOLLAND GROWN DAFFODILS : as it is impossible for me to grow all the bulbs needed to fill my orders, many of these orders are partly filled with Dutch bulbs. They produce wonderful flowers the first season; in subsequent seasons they produce a larger number of flowers, which sometimes are of less substance, and the stems not so sturdy. By taking these bulbs up after the 2nd. season, dividing and replanting (all this at the proper time, - see Cultural Notes), they will again produce the same fine flowers, - and not need replanting again so soon.

2a	*SCARLET LEADER (Back.)	(M) creamy yellow & solid vivid orange-red	.30
2a	SCARLET ROYAL (Lubbe)	(E) bright yellow and rich dark red	10.50

MYOSOTIS - fine light blue; silvery centered bells, magnificent spike	2.50
PRINCESS MARGARET - pleasing soft pink; large well formed spike	2.50
QUEEN OF THE PINKS - large compact spikes, of lovely bright pink	2.50
YELLOW HAMMER - a good yellow; early	2.50

* * * * * *

BULBS FOR FORCING : many of the bulbs offered in this List may also be grown indoors in pots, or bulb pans. The Hyacinths, earlier Tulips, and many Daffodils, - especially the Yellow Trumpets, and large-cupped varieties, - are splendid for this purpose. If potted up in good time, they may be had in bloom by mid-January, or a little later, to brighten and cheer your home, and to bring a touch of Spring-time, long before it arrives outdoors. Pots may be secured from your local florist, along with information on the procedure to follow. Informative articles on this phase of bulb growing will also be found in many garden magazines and publications. (If you plan to use part of the bulbs ordered for this purpose, it would be well to so state, so that the best bulbs for forcing will be sent.)

T U L I P S

A select list of the finest in Tulips, including many new recent introductions. Top-size, best quality bulbs, from several of Holland's leading growers. Priced per dozen (no less than one-half doz. of a variety), with 100 for 7 times this dozen price. Tulips, Hyacinths, etc. should be planted in quantity, for mass effect, - preferably several dozen or more of a variety. (Please don't forget, if you are comparing these prices with others, to take the discount allowed on early orders into consideration.)

TULIP FOSTERIANA	- large long-petalled, early flowers	
ALBAS	- ivory white, softly shaded pink; yellow base	2.50
ALPINE GLOW	- carmine-rose, edged yellow; inside amber-yellow, on red blotched black base	2.10

REMEMBRANCE - dark blue	.55

MUSCARI (Grape Hyacinths)

ARMENIACUM - splendid large deep blue	.45
AZUREUS ALBUS - white	.65
HEAVENLY BLUE - clear light blue	.45

SCILLAS

Scillas, - or squills, - are excellent in rock gardens, among shrubbery, under trees, etc., etc. The bulbs increase rapidly, are hardy, and will last for years. The 'Sibiricas' are early blooming, and quite small, - Spring Beauty is the larger, but still only around 6 inches. The 'Campanulatas' (or wood hyacinths) are taller, up to 18 inches, and later blooming, usually with the late Tulips. Their slender spikes somewhat resemble Hyacinths, and they come in different shades of blue, pink, and white. They prefer partial shade, and so are right at home under shrubbery and trees, even Pines and Hemlocks, - (but not too close to their roots.)

CAMPANULATA BLEU CELESTE - light blue	.65
" EXCELSIOR - deep blue	.65
" PEACH BLOSSOM - soft rose	.65
" QUEEN OF THE PINKS - deep pink	.55
" WHITE TRIUMPHATOR - large pure white	.65
SIBIRICA (Amoena) - delft blue	.70
" ALBA - pure white	.55
" SPRING BEAUTY - delft blue, - larger than 'Amoena'	.75

ROYAL HORTICULTURAL SOCIETY of LONDON

C L A S S I F I C A T I O N of D A F F O D I L S

DIVISION 1. Trumpet Narcissi : one flower to the stem, with the trumpet as long as, or longer than the perianth segments (petals).

Examples - King Alfred, Preamble, Mount Hood.

(A) Perianth colored (varying shades of yellow); trumpet colored also, - not paler than the perianth.

(B) Perianth white; trumpet colored (some shade of yellow, usually).

(C) Perianth and trumpet white, - or nearly so.

(D) Any other color combination, - such as the trumpet being lighter in color than the perianth.

DIVISION 2. Large-cupped Narcissi : one flower to the stem; crown MORE than one-third, to nearly the length of the perianth segments.

Examples - Galway, Green Island, Kilworth.

(A), (B), (C), and (D) as in Div. 1, - except that in (A) the colored crowns may be yellow, or orange, red etc., and in (B) wholly, or in part, yellow, orange, red, pink, buff, apricot, salmon, etc., etc.

DIVISION 3. Small-cupped Narcissi : one flower to the stem; cup LESS than one-third the length of the perianth segments.

Examples - Mangosteen, Matapan, Chinese White.

(A), (B), and (C) as in Division 2.

DIVISION 4. Double varieties.

DIVISION 5. Triandrus Narcissi, of garden origin : usually three (sometimes more, or less) white, creamy white, or pale yellow flowers per stem.

Examples - Tresamble, Stoke, Silver Chimes.

(A) Cup, or corona, Not less than two-thirds the length of the perianth segments.

(B) Cup, or corona, LESS than two-thirds the length of the per. segments.

DIVISION 6. Cyclamineus Narcissi, of garden origin : medium sized or smaller flowers, usually with reflexed petals.

Examples - February Gold, Dove Wings, Beryl.

(A), and (B), as in Division 5.

DIVISION 7. Jonquilla Narcissi, of garden origin : usually golden yellow, more or less fragrant, and with 1 to 3 or more florets per stem.

Examples - Hathor, Golden Perfection, Cherie.

(A), and (B) as in Divisions 5 and 6.

DIVISION 8. Tazetta Narcissi, of garden origin : mostly Poetaz Hybrids, with 3 to 6 or more, more or less fragrant florets per stem.

Examples - Geranium, Martha Washington.

DIVISION 9. Poeticus Narcissi, of garden origin : - the Poet's narcissi, snow-white petals, and red rimmed cups, or eyes.

Examples - Actaea, Cantabile.

DIVISION 10. Species and wild forms. Example - Jonquilla single.

DIVISION 11. Miscellaneous; those not falling in any other group.
